Form TECH-5 Curriculum Vitae for Nominated Personnel

Page limit: Maximum of five (5) pages per CV (excluding part 14. Certification, which does not count toward the five-page limit)

Note to the CV Editor: Please review the CV format against the requirements specified in the RFP and ensure that the Certifications section is fully compliant and aligned with the requested format and criteria. Please verify this carefully before finalizing the CV.

Please ensure that this note and all highlighted sections are removed before adding the CV to the final dossier.

1. **Proposed Position:** Environmental, Health and Safety Expert
2. **Name of Entity:** Eptisa
3. **Name of Expert:** Esra Elma
4. **Date of Birth:** 1990-02-18 **Citizenship:** Turkey
5. **Complete personal contact details:** , Turkey
   +90 312 439 38 62 | bidturkiye@eptisa.com / eelma@eptisa.com
6. **Education:**
   2018 — Istanbul Esenyurt University; M.Sc. in Occupational Health and Safety
   2008 – 2013 — Süleyman Demirel University; B.Sc. in Environmental Engineer
7. **Membership in Professional Associations:**
   B Class Occupational Health and Safety Specialist Certificate; ISO 9001:2015 Quality Management System Certificate Basic Training; ISO 45001:2018 Occupational Health and Safety Management System Basic Training; ISO 14001:2015 Environmental Management System Basic Training; Explosion Protection Document Training; Sustainability Performance Indicators (Carbon, Water and Energy) Calculation and Evaluation Certificate Program — Istanbul Technical University; Chamber of Environmental Engineers, Turkey; National Examination Board in Occupational Safety and Health (NEBOSH); International General Certificate (IG1-IG2)
8. **Other Training:**
   Full computer literacy; MS Office
9. **Countries of Work Experience:**
   Turkey, Tajikistan, Uzbekistan
10. **Languages:** Level of Proficiency (mother tongue, excellent, good, fair, poor)

Language	Speaking	Reading	Writing
Turkish	Excellent	Excellent	Excellent
English	Very Good	Very Good	Very Good

11. **Employment Record:**

1. **From [Month, Year]:** 11-2024 **To [Month, Year]:** Present
   Employer: EPTISA ENGINEERING AND CONSULTANCY
   Positions held: Environmental Expert
2. **From [Month, Year]:** 12-2023 **To [Month, Year]:** Present
   Employer: EPTISA ENGINEERING AND CONSULTANCY
   Positions held: International Environmental and Social Safeguard Specialist
3. **From [Month, Year]:** 01-2024 **To [Month, Year]:** 01-2025
   Employer: EPTISA ENGINEERING AND CONSULTANCY
   Positions held: International Environmental Expert
4. **From [Month, Year]:** 05-2021 **To [Month, Year]:** 05-2025
   Employer: EPTISA ENGINEERING AND CONSULTANCY
   Positions held: ENVIRONMENTAL AND OHS EXPERT

5. **From [Month, Year]:** 03-2021 **To [Month, Year]:** 09-2025
Employer: EPTISA ENGINEERING AND CONSULTANCY
Positions held: ENVIRONMENTAL AND OHS EXPERT

6. **From [Month, Year]:** 11-2020 **To [Month, Year]:** 04-2025
Employer: EPTISA ENGINEERING AND CONSULTANCY
Positions held: ENVIRONMENTAL AND OHS EXPERT

7. **From [Month, Year]:** 10-2020 **To [Month, Year]:** 05-2025
Employer: EPTISA ENGINEERING AND CONSULTANCY
Positions held: ENVIRONMENTAL AND OHS EXPERT

8. **From [Month, Year]:** 06-2020 **To [Month, Year]:** 06-2025
Employer: EPTISA ENGINEERING AND CONSULTANCY
Positions held: ENVIRONMENTAL AND OHS EXPERT

9. **From [Month, Year]:** 12-2019 **To [Month, Year]:** 09-2024
Employer: EPTISA ENGINEERING AND CONSULTANCY
Positions held: ENVIRONMENTAL AND OHS EXPERT

10. **From [Month, Year]:** 11-2019 **To [Month, Year]:** 08-2022
Employer: EPTISA ENGINEERING AND CONSULTANCY
Positions held: ENVIRONMENTAL AND OHS EXPERT

11. **From [Month, Year]:** 12-2018 **To [Month, Year]:** 12-2019
Employer: EPTISA ENGINEERING AND CONSULTANCY
Positions held: ENVIRONMENTAL AND OHS EXPERT

12. **From [Month, Year]:** 06-2018 **To [Month, Year]:** 05-2019
Employer: EPTISA ENGINEERING AND CONSULTANCY
Positions held: ENVIRONMENTAL AND OHS EXPERT

13. **From [Month, Year]:** 03-2018 **To [Month, Year]:** 06-2018
Employer: ESLA ENGINEERING
Positions held: EHS ENGINEER

14. **From [Month, Year]:** 06-2016 **To [Month, Year]:** 11-2017
Employer: CCN HOLDING – DIA CONSTRUCTION – SUBCONTRACTOR GENCAY DEMIR-DOĞRAMA
Positions held: EHS ENGINEER

15. **From [Month, Year]:** 03-2015 **To [Month, Year]:** 10-2015
Employer: CANALP ENGINEERING
Positions held: PROJECT ENGINEER

12. Detailed Tasks Assigned	13. Work Undertaken that Best Illustrates Capability to Handle the Tasks Assigned

	Name of assignment or project: SUPERVISION FOR CONSTRUCTION OF ÇERKEZKÖY – KAPIKULE SECTION OF HALKALI – KAPIKULE RAILWAY LINE PROJECT (FIDIC 99 RED BOOK) **Year:** 11-2024 **Location:** Edirne, Kırklareli, Tekirdağ; TURKIYE **Client:** Ministry of Transport and Infrastructure, Directorate General for European Union Affairs and Foreign Relations, Department of European Union Investments **Employer:** EPTISA ENGINEERING AND CONSULTANCY **Main project features:** Project is comprising the construction of Çerkezköy – Kapıkule Railway Line with a total length of 152.907 km using the EU loan under FIDIC 99 Red Book, first edition 1999. Consulting services for pre-construction activities for the period of May 2019 – July 2019 (18 months), the field supervision of the construction facilities for the period July 2019 – July 2024 (48 months) with a one-year Defect Liability Period ending with a 2 months final payment and closure procedure from July to September 2024. The scope of construction works includes, but not limited to; Construction of Çerkezköy – Kapıkule Railway Line with a total length of 152.907 km., principally double-track configuration, a design speed of 200 km/h., electrified at 25 kV and equipped with ERTMS/ETCS Level signaling, Construction of all infrastructure and superstructure (ballast, rails, sleepers, turnouts, buffer-stop) works, Construction of cut and cover tunnels, viaducts, bridges, underpasses, overpasses and ancillary structures including culverts, retaining walls, Soil improvement, all drainage works and platform works, Signaling works; CTC (Central Traffic Control) center and building, interlocking systems, trackside signaling systems, Automatic Train Protection (ATP), ETCS Level 1 trackside systems, point heating system, energy supply, cabling, interfaces, hot axle box and blocked brake detection system, Telecommunication works; IP/MPLS network management system, transmission systems, passenger information and public address system, telephone system, Electrification works; catenary systems, remote control system (SCADA), substations (transformer center), Construction and removal of all temporary installations and facilities. **Positions held:** Environmental Expert **Activities performed:** Ensure that the Works Contractor performs the Works in accordance with the approved Environmental Plan and any other Environmental provisions included in the Works Contract or existing in Turkish law; Review of full implementation of the Works Contractor Health, Safety and Environmental (HSE) Management Plans and associated plans, standards, procedures and requirements; Arrange periodic site visit and make inspection of Works Contractor's site HSE performing; Site auditing and Environmental Monitoring Plan preparing monitoring reports; Correspond with the Works Contractor officially in order to provide advice and suggestions with regard to performed activities; Notifying non-compliance situations in HSE performance with NCR (Non-Conformity Report/Form) and warning letters to the Works Contractor; Overall responsible for the observation, monitoring, coordination and supervision of control of work activities in accordance with the procedures and within designated area; Participating in weekly / monthly progress, steering committee and Ad-Hoc meetings on site with the participation of the Works Contractor, Engineer and PIU; To participate Environmental and progress meetings; Preparation of Engineer's Monthly and Quarterly Progress Reports

Name of assignment or project: RURAL WATER SUPPLY AND SANITATION PROJECT (RWSSP) - CONSULTING SERVICES FOR CONSTRUCTION SUPERVISION AND CONTRACT MANAGEMENT / RFP NO: RWSSP-CS/010-1
Year: 12-2023 – 12-2023
Location: Tajikistan
Client: Municipal Infrastructure Development Project Management Unit (MIDPMU)
Employer: EPTISA ENGINEERING AND CONSULTANCY
Main project features: The Rural Water Supply and Sanitation Project (RWSSP), financed by the World Bank is under the IDA grant No. 0431-TJ from the International Development Association for the implementation by the Republic of Tajikistan. The project covers water supply systems in the Vosse district and the inter-district water supply system of the Vakhsh zone, which includes six districts located in the southern part of the Khatlon region (Vakhsh, Levakand, Kushoniyon, Dusti, Balkhi, and Jayhun). This project is the project of the World Bank oriented to improving water supply and sanitation in the Khatlon region, where 2.5 million people live in rural areas. Packages within the scope of the project; RWSSP W.NCB/008 "Reconstruction of the head water intake; RWSSP W.NCB/015 "Construction of a water conduit from WTF to DCH1"; RWSSP W.NCB/16-1 "Construction of water pipelines and site for tanks in zone 2A, 2B (Kushoniyon) zone 3D (Vakhsh); RWSSP W.ICB/028 "Reconstruction of water treatment facilities
Positions held: International Environmental and Social Safeguard Specialist
Activities performed: Monitoring that the civil works contractor is implementing all environmental, health and safety and social mitigation and monitoring works required in the national legislation, the agreed project Environmental and Social Impact Analysis Report, the Project Environmental and Safeguard Monitoring Plan, the ADB's Performance Requirements and the contract documents; Assisting the Project Implementation Unit with preparing ad-hoc reports describing incidents or accidents or grievances relating to the project that are likely to have a material adverse effect on the environment, health or safety or are a reputation risk to the project; Preparing quarterly reports on environmental, health and safety and social matters, as referred to in the Contract

Name of assignment or project: TASHKENT PROVINCE WATER SUPPLY DEVELOPMENT PROJECT / Loan No. 3457-UZB
Year: 01-2024 – 01-2025
Location: Tashkent, Uzbekistan
Client: Tashkent Suv Taminoti LLC
Employer: EPTISA ENGINEERING AND CONSULTANCY
Main project features: The ADB funded project consists of; reconstruction of the water intake structure, construction and reconstruction of wells, with the installation of a borehole pump with a submersible electric motor, reconstruction of collector lines from wells and reconstruction of WDC "VU-1"
Positions held: International Environmental Expert
Activities performed: Using the steps defined in the LARP/EMP, monitor the implementation of the resettlement/EMP using the compliance monitoring checklist included in the project Initial Environmental Examination (IEE) (prepared for the construction period); Elaborate specifications and relevant TOR for the implementation of the water, air and soil analysis and field inspections in accordance with the EMP; Supervise the pre-commissioning baseline monitoring following the Environmental Management Plan (EMP) provided in the IEE; Monitor and report on handling of waste during the decommissioning of the obsolete buildings of the old Kadirya WTP as well as of all other water distribution centers being rehabilitated or reconstructed; Provide assistance to contractors and TPS to elaborate a waste management plan including options and guidelines for disposal or recycling and landscaping; Provide assistance to the TPS to prepare a final cleanup report and make sure that the TPS will duly file a completion report specifying who was contacted and when and that the site restoration was done satisfactorily; Assist the international environmental specialist to elaborate and propose reporting formats; make sure that results of monitoring are reported in quarterly, bi-annual, annual reports and in the Project completion reports; Assist the Project Coordination Unit (PCU) in dealing with contractors for the implementation of the EMP and supervise the compliance of the contractors in implementing the environmental mitigation measures; Make sure that the Contractors will: i) carry out the EMP as specified in the Initial Environmental Examination (IEE) and further required in the Contractor's Bill of Quantities (BOQ), and i) conduct environmental monitoring including measurements and observations on dust and air pollution during construction in accordance with the Quarterly Compliance Monitoring Checklist for Contractor; Assist the PCU in dealing with the road Police Department in preparing traffic emergency plans and temporary deviations of traffic during construction; In collaboration with the PCU Environment & Social Safeguards Specialist supervise the implementation of the sludge management plan for the new WTP and report to PCU, PM and TPS accordingly; Supervise the EMP completion report to be prepared by Contractors and assist PCU and TPS in timely obtaining such reports; Assist PCU and TPS to: i) prepare and maintain a grievance redress mechanism, ii) establish a grievance redress committee (GRC), and iii) carry out monitoring on effectiveness; make sure that: i) GRC will have strong female representation, and ii) the grievance process is implemented effectively, according to the plan and schedule in the IEE; Provide inputs to the Project outputs/reports as required

Name of assignment or project: SUPERVISION SERVICES FOR CONSTRUCTION OF REVITALISATION WORKS FOR HAYDAR ALIYEV STREET AND ANI RUINS
Year: 05-2021 – 05-2025
Location: Kars, TURKIYE
Client: Ministry of Industry and Technology, DG for EU and Foreign Affairs-Directorate of EU Financial Programs
Employer: EPTISA ENGINEERING AND CONSULTANCY
Main project features: The operation of "Kars City with Its Own Historical Identity Project" is composed of three components; namely Works, Supervision, and Technical Assistance. Within the supervision contract, the Contractor will provide supervision and contract management services (as the Engineer) for the Works Contract; "Renovation and Rehabilitation Investments in Kars City Centre and Infrastructure Improvements in Ani Ruins" to be executed under Conditions of Contract for Construction for Building and Engineering Works Designed by the Employer, First Edition 1999, (Red FIDIC Book) in particular regarding quality, time and cost. The Works contract aims to reach a qualified urban environment on both Kars City Centre with harmonious and suitable facades with the historical urban pattern and Ani Ruins. The works which will be implemented under the Supervision and Contract Management of the Contractor comprises of: Renovation and rehabilitation investments in Kars city center Improvement of facades of the buildings in Haydar Aliyev Street.(9800 m2 circa) Pavements, landscape, lighting, street furniture, signing along the newly established route(700 m circa) and afforestation. Street furniture, signing, fences improvements in Ani Ruins
Positions held: ENVIRONMENTAL AND OHS EXPERT
Activities performed: Following national and international Environmental, Health and Safety (EHS) regulations; Supervision of Environmental, Health and Safety (EHS) issues during the execution of the works contract; Awareness raising regarding Environmental, Health and Safety (EHS); Reporting of environmental - occupational accidents and near-miss incidents; Periodic trainings on Environmental, Health and Safety (EHS) issues; Preparation of Relevant Reports

Name of assignment or project: TECHNICAL ASSISTANCE AND SUPERVISION FOR RIZE WASTEWATER PROJECT
Year: 03-2021 – 09-2025
Location: Rize, TURKIYE
Client: General Directorate of European Union and Foreign Relations, Ministry of Environment and Urbanization
Employer: EPTISA ENGINEERING AND CONSULTANCY
Main project features: The Service Contract for the provision of Technical Assistance and Supervision services by the Contractor has the following main tasks: Administrative, technical and financial capacity building for the WUD and PIU of Rize Municipality, Modernization of the WUD and provision of the necessary training and support for institutional sustainability, Technical assistance to the WUD and PIU by practical training including project management, and management of the WWTP after construction, Technical assistance to the WUD and PIU in the performance of leakage detection and Non-Revenue Water reduction program, Preparation of Sludge Management Plan to assess the final usage alternatives of the sludge produced at the wastewater treatment plant, Contract management and construction supervision for the implementation of the wastewater treatment plant and wastewater collection system (Works Contracts), The Works Contracts to be supervised in this project indicatively comprise the following; Construction of Rize Wastewater Treatment Plant (FIDIC Yellow Book) with 27 months of the construction period and 24 months of DNP; Complete engineering design for the wastewater treatment plant, Construction of approximately 27,000 m3/d average flow rate capacity wastewater treatment plant including the supply and installation of electrical and mechanical equipment and all auxiliary facilities for the operation of the plant, Training, operation and maintenance. Construction of Rize Wastewater Collection System (FIDIC Red Book) with 24 months of the construction period and 12 months of DNP; Construction of approximately 20 km wastewater collector pipeline, Construction of approximately I .5 km Special Crossing of the culvert, river, highway, etc. by pipe jacking and/or horizontal drilling wastewater collector pipeline, Construction of 3 new wastewater pumping stations (Bagdatlı, Ciftekavak and Hal), Construction of approximately 3 km forced mains and associated structures, Construction of approximately 500 manholes, Installation of automation system for the pumping stations, Preparation of wastewater collection system network as-built plans for constructed sewer mains.
Positions held: ENVIRONMENTAL AND OHS EXPERT
Activities performed: Ensure that the Works Contractor performs the Works in accordance with the approved Environmental, Health and Safety (EHS) Plan and any other Environmental, Health and Safety (EHS) provisions included in the Works Contract or existing in Turkish law; Review of full implementation of the Works Contractor Environmental, Health and Safety (EHS) Management Plans and associated plans, standards, procedures and requirements; Arrange periodic site visit and make inspection of Works Contractor's site EHS performing; Correspond with the Works Contractor officially in order to provide advice and suggestions with regard to performed activities; Notifying non-compliance situations in Environmental, Health and Safety (EHS) performance with NCR (Non-Conformity Report/Form) and warning letters to the Works Contractor; Communicate, encourage and reinforce the authority to "Stop Work" in necessary dangerous situation; Overall responsible for the observation, monitoring, coordination and supervision of control of work activities in accordance with the procedures and within designated area; Participating in weekly / monthly progress, steering committee and Ad-Hoc meetings on site with the participation of the Works Contractor, Engineer and PIU; Awareness-raising Meetings for Contractor's staff including both Health, Safety and Environment issue; Capacity building activities (EHS trainings) for both Health & Safety and Environment issue for both PIU and WUD; To participate EHS and progress meetings; Preparation of Engineer's Interim, Monthly, Quarterly Progress Reports; Site auditing and Environmental Monitoring Plan preparing monitoring reports; Preparation and follow up of Environmental Impact Monitoring Forms

Name of assignment or project: TECHNICAL ASSISTANCE AND SUPERVISION FOR SORGUN WASTEWATER TREATMENT PLANT PROJECT EuropeAid/139547/IH/SER/TR (FIDIC YELLOW BOOK)
Year: 11-2020 – 04-2025
Location: Sorgun/ Yozgat, TURKIYE
Client: General Directorate of European Union and Foreign Relations, Ministry of Environment and Urbanization
Employer: EPTISA ENGINEERING AND CONSULTANCY
Main project features: Sorgun wastewater treatment plant will be either an extended aeration activated sludge plant with aerobic stabilization of sludge in the activated sludge tanks or activated sludge plant and with separate aerobic sludge digesters for sludge stabilization. In both alternatives carbon, nitrogen and phosphorus removal shall be accomplished. The WWTP shall be designed and constructed for a wastewater flow of approximately 9,100 m3 per day for target year of 2033. The scope of works is as follows; Complete engineering designs, Construction of the complete wastewater treatment plant including the supply and installation of electrical and mechanical equipment and all auxiliary facilities for the operation of the plant, Civil and pipe-laying works, including testing and commissioning of the discharge line and supply of equipment, Construction of effluent discharge main from treatment plant to the receiving body, Testing, start-up and trial operation and commissioning of the plant, Preparation of as-built documentation and operation and maintenance manuals, Practical training of staff (management, operation, maintenance and service) management / supervision of operation & maintenance of the wastewater treatment plant during Defects Notification Period (DNP).
Positions held: ENVIRONMENTAL AND OHS EXPERT
Activities performed: Ensure that the Works Contractor performs the Works in accordance with the approved Environmental, Health and Safety (EHS) Plan and any other Environmental, Health and Safety (EHS) provisions included in the Works Contract or existing in Turkish law; Review of full implementation of the Works Contractor Environmental, Health and Safety (EHS) Management Plans and associated plans, standards, procedures and requirements; Arrange periodic site visit and make inspection of Works Contractor's site Environmental, Health and Safety (EHS) performing; Correspond with the Works Contractor officially in order to provide advice and suggestions with regard to performed activities; Notifying non-compliance situations in EHS performance with NCR (Non-Conformity Report/Form) and warning letters to the Works Contractor; Communicate, encourage and reinforce the authority to "Stop Work" in necessary dangerous situation; Overall responsible for the observation, monitoring, coordination and supervision of control of work activities in accordance with the procedures and within designated area; Participating in weekly / monthly progress, steering committee and Ad-Hoc meetings on site with the participation of the Works Contractor, Engineer and PIU; Awareness-raising Meetings for Contractor's staff including both Environmental, Health and Safety (EHS) issue; Capacity building activities (EHS trainings) for both Environmental, Health and Safety (EHS) issue for both PIU and WUD; To participate HSE and progress meetings; Preparation of Engineer's Interim, Monthly, Quarterly Progress Reports; Site auditing and Environmental Monitoring Plan preparing monitoring reports; Preparation and follow up of Environmental Impact Monitoring Forms

Name of assignment or project: TECHNICAL ASSISTANCE AND SUPERVISION FOR SIVAS KIZILIRMAK RIGHT AND LEFT BANKS WASTEWATER COLLECTOR (FIDIC RED BOOK)
Year: 10-2020 – 05-2025
Location: Sivas, TURKIYE
Client: General Directorate of European Union and Foreign Relations, Ministry of Environment and Urbanization
Employer: EPTISA ENGINEERING AND CONSULTANCY
Main project features: Wastewater Collection System (FIDIC Red Book) with 26 months of construction period and 12 months of DNP Wastewater collector system will be constructed on the Sivas Kızılırmak River right and left banks that is approximately 32 km collector line, diameter of the collector is change in the range of Ø300- Ø1600 mm, 1.3 km Ø 160 mm HDPE force main, 3 pumping stations. The works under the supervision and contract management of the Contractor comprises the following: Ø300 mm - 3.5 km Corrugated high density polyethylene (HDPE) pipe, Ø400 mm - 3 .8 km Corrugated high density polyethylene (HDPE) pipe, Ø500 mm - 0.9 km Corrugated high density polyethylene (HDPE) pipe, Ø600 mm - 3.4 km Corrugated high density polyethylene (HDPE) pipe, Ø800 mm - 3.8 km Corrugated high density polyethylene (HDPE) pipe, Ø1000 mm - 3 .0 km Epoxy coated reinforced concrete pipe, Ø1200 mm - 2.4 km Epoxy coated reinforced concrete pipe, Ø1400 mm - 6.6 km Epoxy coated reinforced concrete pipe, Ø1600 mm - 4.0 km collector line system Epoxy coated reinforced concrete pipe 8 underground highway, railway and river crossing with horizontal drilling 1.3 km Ø160 mm HDPE force main
Positions held: ENVIRONMENTAL AND OHS EXPERT
Activities performed: Ensure that Contractor are obeying the Environmental, Health and Safety (EHS) requirements and documents stated in the Works Contract, FIDIC and Turkish law requirements; Review of full implementation of the contractor Environmental, Health and Safety (EHS) execution plan and associated plans, standards, procedures and requirements; Arrange periodic site visit and make inspection of Contractor's site EHS performing; Correspond with the Contractor officially in order to provide advice and suggestions with regard to performed activities; Notifying non-compliance situations in EHS performance with NCR (Non-Conformity Report/Form) and warning letters to the Contractor; Communicate, encourage and reinforce the authority to "Stop Work" in necessary dangerous situation; Overall responsible for the observation, monitoring, coordination and supervision of control of work activities in accordance with the procedures and within designated area; Awareness-raising Meetings for Contractor's staff including both Environmental, Health and Safety (EHS) issue; Capacity building activities (EHS trainings) for both Environmental, Health and Safety (EHS) issue for both PIU and WUD; To participate HSE and progress meetings; Preparation of Engineer's Interim, Monthly, Quarterly Progress Reports; Site auditing and Environmental Monitoring Plan preparing monitoring reports; Preparation and follow up of Environmental Impact Monitoring Forms

Name of assignment or project: TECHNICAL ASSISTANCE AND SUPERVISION FOR ÇARŞAMBA WASTEWATER PROJECT (INCLUDING COLLECTOR LINES) (FIDIC YELLOW BOOK)
Year: 06-2020 – 06-2025
Location: Çarşamba/ Samsun, TURKIYE
Client: General Directorate of European Union and Foreign Relations, Ministry of Environment and Urbanization
Employer: EPTISA ENGINEERING AND CONSULTANCY
Main project features: Construction of 1st Stage of the Wastewater Treatment Plant; complete engineering designs for the wastewater treatment plant, construction of the complete approximately 15,500 m3/d average flow rate capacity wastewater treatment plant including the supply and installation of electrical and mechanical equipment and all auxiliary facilities for the operation of the plant, training, operation and maintenance. Construction of the two New Pumping Stations namely YTM-7 and YTM-8 and the Collectors: new collector line for west side to the YTM-7 (910 m of Ø 300 mm and 29,3 m of 600 mm Corrugated HDPE pipe), construction of the pressure main from the YTM7 pumping station through the new pumping station YTM8 (1.730 m of 500 mm PE100 PN10 pipe), new collector line for west side to the YTM-8 (199 m of Ø1000 mm Corrugated HDPE pipe), construction of the pressure main from the YTM8 pumping station to the head of the new main collector (420 m of 710 mm PE100 PN10 pipe), collector to the wastewater treatment plant site (3.896 m of 1000 mm diameter Corrugated HDPE pipes), discharge line of the WWTP (186 m of Ø 900 mm Corrugated HDPE pipes), overflow line of collector lines (436 m of Ø600 mm Corrugated HDPE pipe) and 135 m concrete box, construction of two wastewater pumping stations each with odor removal system, construction of river crossing pipe bridge
Positions held: ENVIRONMENTAL AND OHS EXPERT
Activities performed: Ensure that Contractor are obeying the EHS requirements and documents stated in the Works Contract, FIDIC and Turkish law requirements; Review of full implementation of the contractor EHS execution plan and associated plans, standards, procedures and requirements; Arrange periodic site visit and make inspection of Contractor's site EHS performing; Correspond with the Contractor officially in order to provide advice and suggestions with regard to performed activities; Notifying non-compliance situations in EHS performance with NCR (Non-Conformity Report/Form) and warning letters to the Contractor; Communicate, encourage and reinforce the authority to "Stop Work" in necessary dangerous situation; Overall responsible for the observation, monitoring, coordination and supervision of control of work activities in accordance with the procedures and within designated area; Awareness-raising Meetings for Contractor's staff including both Health, Safety and Environment issue; Capacity building activities (EHS trainings) for both Environmental, Health and Safety (EHS) issue for both PIU and WUD; To participate EHS and progress meetings; Preparation of Engineer's Interim, Monthly, Quarterly Progress Reports; Site auditing and Environmental Monitoring Plan preparing monitoring reports; Preparation and follow up of Environmental Impact Monitoring Forms

Name of assignment or project: TECHNICAL ASSISTANCE AND SUPERVISION FOR KASTAMONU WASTEWATER TREATMENT PLANT PROJECT (FIDIC YELLOW BOOK)
Year: 12-2019 – 09-2024
Location: Kastamonu, TURKIYE
Client: General Directorate of European Union and Foreign Relations, Ministry of Environment and Urbanization
Employer: EPTISA ENGINEERING AND CONSULTANCY
Main project features: To provide supervision services for the Works Contract with the duration of 27 months construction period and 24 months of DNP to be supervised in this project indicatively comprises the following components: Complete engineering design for the wastewater treatment plant, Construction of the approximately 30,000 m3/d average flow rate capacity wastewater treatment plant including the supply and installation of electrical and mechanical equipment and all auxiliary facilities for the operation of the plant, Training, operation and maintenance. Technical Assistance and Supervision services by the Contractor has the following main tasks: Administrative, technical and financial capacity building for the WUD / PIU of Kastamonu Municipality, Modernization of the WUD and provision of the necessary training and support for the institutional sustainability, Technical assistance to the WUD / PIU by practical training including project management, and management of the WWTP after construction, Technical assistance to the WUD / PIU in performance of leakage detection and Non-Revenue Water reduction programmed, Preparation of Sludge Management Plan to assess the final usage alternatives of the sludge produced at the wastewater treatment plant, Contract management and construction supervision for the implementation of wastewater treatment plant (Works Contract).
Positions held: ENVIRONMENTAL AND OHS EXPERT
Activities performed: Ensure that Contractor are obeying the EHS requirements and documents stated in the Works Contract, FIDIC and Turkish law requirements; Review of full implementation of the contractor EHS execution plan and associated plans, standards, procedures and requirements; Arrange periodic site visit and make inspection of Contractor's site EHS performing; Correspond with the Contractor officially in order to provide advice and suggestions with regard to performed activities; Notifying non-compliance situations in EHS performance with NCR (Non-Conformity Report/Form) and warning letters to the Contractor; Communicate, encourage and reinforce the authority to "Stop Work" in necessary dangerous situation; Overall responsible for the observation, monitoring, coordination and supervision of control of work activities in accordance with the procedures and within designated area; Awareness-raising Meetings for Contractor's staff including both Health, Safety and Environment issue; Capacity building activities (EHS trainings) for both Environmental, Health and Safety (EHS) issue for both PIU and WUD; To participate EHS and progress meetings; Preparation of Engineer's Interim, Monthly, Quarterly Progress Reports; Site auditing and Environmental Monitoring Plan preparing monitoring reports; Preparation and follow up of Environmental Impact Monitoring Forms

Name of assignment or project: SUPERVISION SERVICES FOR CONSTRUCTION OF MALATYA DRIED APRICOT LICENSED WAREHOUSE AND EXCHANGE (FIDIC RED BOOK)
Year: 11-2019 – 08-2022
Location: Malatya, TURKIYE
Client: General D Ministry of Industry and Technology, DG for EU and Foreign Affairs, Directorate of EU Financial Programmes MoIT/DoEUFP)
Employer: EPTISA ENGINEERING AND CONSULTANCY
Main project features: The operation of "Malatya Dried Apricot Licensed Warehouse and Exchange" has four (4) components which are; Works, Supervision of Works, Supply, Technical Assistance. Works Contract of the Project consists of the following executions: 10 cold storage units each having a capacity of 500 tons with a total capacity of 5.000 tons and 5.000 m2, 990 kWp capacity Energy Generation Facility, using mono-crystalline silicon photovoltaic solar panels, Administrative Building with an approximately 2.000 m2 construction area. Auxiliary facilities of approximately 400 m2. Supply Contracts contains the following: Licensed warehouse equipment, machinery and vehicles such as pallets, trans-pallets and forklift, Apricot processing and packaging machinery and equipment, Laboratory equipment, Office equipment.
Positions held: ENVIRONMENTAL AND OHS EXPERT
Activities performed: Ensure that Contractor are obeying the EHS requirements and documents stated in the Works Contract, FIDIC and Turkish law requirements; Review of full implementation of the contractor EHS execution plan and associated plans, standards, procedures and requirements; Arrange periodic site visit and make inspection of Contractor's site EHS performing; Correspond with the Contractor officially in order to provide advice and suggestions with regard to performed activities; Notifying non-compliance situations in EHS performance with NCR (Non-Conformity Report/Form) and warning letters to the Contractor; Communicate, encourage and reinforce the authority to "Stop Work" in necessary dangerous situation; Overall responsible for the observation, monitoring, coordination and supervision of control of work activities in accordance with the procedures and within designated area; Awareness-raising Meetings for Contractor's staff including both Health, Safety and Environment issue; Capacity building activities for both Environmental, Health and Safety (EHS) issue for both PIU and WUD; To participate EHS and progress meetings; Preparation of Engineer's Interim, Monthly, Quarterly Progress Reports; Site auditing and Environmental Monitoring Plan preparing monitoring reports; Preparation and follow up of Environmental Impact Monitoring Forms

Name of assignment or project: SUPERVISION SERVICES FOR CONSTRUCTION OF WASTEWATER TREATMENT PLANT IN HASSA / HATAY WITHIN THE SCOPE OF TURKEY RESILIENCE PROJECT IN RESPONSE TO THE SYRIA CRISIS
Year: 12-2018 – 12-2019
Location: Hatay, TURKIYE
Client: United Nations Development Project (UNDP)
Employer: EPTISA ENGINEERING AND CONSULTANCY
Main project features: To provide supervision services for the Works Contract "Construction of Wastewater Treatment Plant in Hassa/Hatay", with a daily capacity of 4.000 m3 (Q24 = 46, 3 lt/sec) discharge to service forecasted number of 40.000 population located on 27.000 m2 area, to be executed under "UNDP General Conditions of Contract for Civil Works", in particular, regarding quality, time and cost, on behalf of UNDP (Employer). Supervision on implementation of the Works Contract in a timely manner and within the allocated budget and in full compliance with statement of works / technical specifications and standards, approved designs, terms and conditions of the Works Contract. Safeguarding the quality of construction and overseeing the safety of the works. Professional and legal follow up of construction sites in line with the national legislation.
Positions held: ENVIRONMENTAL AND OHS EXPERT
Activities performed: Responsible for the supervision of health, safety and environmental issues during the execution of the construction; Review and check Contractor's Environmental, Health and Safety (EHS) plans; Preparation of Health and Safety Plan in order to minimization of occupational accident in construction areas; Correspond with the Contractor officially in order to provide suggestions with regard to performed activities; Review of Engineer's Safety Management Plan; Preparation of Engineer's Monthly and Quarterly Progress Reports; Site auditing and preparing Environmental Impact Monitoring Reports and Forms
